Executive Summary

Multidisciplinary executive technologist with 20+ years of practical experience across cybersecurity, telecom security, backend/full-stack engineering, secure systems architecture, infrastructure automation, cryptography, and international consulting. Delivers production-hardened platforms, robust threat defense, secure telecom protocol hardening, and resilient distributed systems for regulated enterprises, digital services, and field operations. Combines analytical field practice, multilingual stakeholder engagement, client advisories, and tactical research with hands-on systems design, implementation, and operational readiness.

Professional Experience

Cybersecurity Architect · Threat Detection & Network Defense Adarma (Remote) — Banking, Telecom, Enterprise *Oct 2024 – May 2025*

- Delivered threat detection architecture, SIEM integration, and precision event correlation for Tier-1 financial and telecom clients.
- Designed cloud/hybrid observability pipelines with Python, Prometheus, Grafana, and Elasticsearch to reduce noisy alerts and improve SOC signal fidelity.
- Implemented Zero Trust segmentation, IAM controls, secure API access, and network hardening for regulated environments.
- Coordinated cross-functional engineering, security operations, and compliance stakeholders on live remediation programs.

Security Architect · Network Systems & Telecom Resilience IronNet (Remote) — Network Security & Threat Intelligence *Dec 2020 – Sep 2024*

- Architected secure infrastructure for network service providers, finance, and enterprise clients with multi-layer encryption and operational monitoring.
- Led SS7, GTP, Diameter, and VoIP security reviews to harden telecom core and subscriber services.
- Built automated incident detection and response capabilities using cloud-native tooling, alert orchestration, and event-driven remediation.
- Delivered secure data migration and systems consolidation with zero data loss and continuous production availability.

Security Consultant · Cloud, Network, Endpoint & API Security Rubica — SMB and Enterprise Security Practice *Feb 2018 – Dec 2020*

- Secured AWS/GCP workloads, segmented network zones, and deployed endpoint hardening for 20+ clients.
- Created custom IDS and SIEM analytics with Python, ELK Stack, Suricata, and Splunk integrations.

- Delivered API security, MFA, JWT/OAuth controls, and secure development guidance for production software teams.
- Established monitoring, alerting, and incident workflows that improved mean-time-to-detection by over 50%.

Independent Consultant · Cybersecurity, Backend Engineering & Systems Architecture

Upwork — Top Rated Plus Apr 2017 - Present

- Delivered mission-critical security audits, cloud architecture, backend engineering, and automation programs with 100% client satisfaction.
- Built production-grade APIs, dashboards, secure web platforms, and automation tooling for financial, healthcare, and e-commerce organizations.
- Advised on operational readiness, systems migration, and compliance readiness across Europe, North America, and MENA.

Selected Technology Programs

VaultGuard — Institutional Crypto Security Platform

- Founder and lead architect of a live crypto security and P2P OTC platform with 137 API endpoints on Cloudflare edge.
- Implemented multi-layer protection using AES-256-GCM, WebAuthn/FIDO2, ZKP identity, secure API gateway, and compliance workflows.
- Deployed across 300+ edge cities with sub-450ms global response and robust operational monitoring.

C2 Framework & Telecom Exploitation Suite

- Developed command-and-control platform with telemetry ingestion, operator dashboards, CVE tracking, and telecom protocol analysis modules.
- Integrated powerful SS7/GSM/IMS research capabilities with secure session management, encrypted comms, and operational visibility.

UK Insolvency Monitor — Enterprise Risk Dashboard

- Built risk monitoring platform tracking 1,000+ UK companies for insolvency events, credit score drops, and director changes.
- Delivered secure API architecture, automated Excel reporting, and data pipeline validation for enterprise risk teams.

Core Competencies

- Security architecture, threat modelling, SIEM/SOC integration, threat intelligence
- Telecom security, SS7/GTP/Diameter analysis, mobile network resilience
- Backend engineering, API design, microservices, automation pipelines
- Cloud & infrastructure operations: AWS, GCP, edge compute, containerization
- Cryptography, secure protocols, data protection, compliance controls
- Field practice, heritage site analysis, cross-cultural engagement, operational consulting

Certifications

- Microsoft / freeCodeCamp — Foundational C# for Software and Security Engineering
- freeCodeCamp — Scientific Computing with Python

- freeCodeCamp — Front-End Development Libraries V8
 - freeCodeCamp — Web Design V8
 - DeepLearning.AI — Fundamentals of Large Language Models
 - HuggingFace — Agent Course
 - Upwork Top Rated Plus — 100% job success and verified global engagement
-

Additional Experience

- Independent field archaeology practice: Mediterranean site surveys, cultural heritage inspection, artifact documentation, and analytical field reporting.
 - Seasonal hotel animator/guest experience specialist: Caribbean World Monastir, Thalasso Monastir, Ksar Kervansaray, and 5-star Bodrum resort.
 - Developed multilingual guest relations, event coordination, team support, public performance, and cross-border hospitality operations.
-
